

Get started

1. Download

Download the Telstra Locator app to your iOS or Android smartphone.

2. Set up

Log in with your Telstra ID and set up your profile.

3. Connect

Press the '+' on the dashboard and follow the steps to set up your tag.

TIP: When connecting your CAT M1 tag, you must be located within LTE-M Coverage on the Telstra IoT Network

Charging your Tag

The battery life of your Cat-M1 Tag depends on use.

To charge, connect the cable into the tag and plug the other end into a USB power source. The light on the top of the tag will start to flash white to indicate that charging has commenced.

Depending on the power source it should take around 2 hours to fully charge.

When charging has completed the light will remain solid white.

From time to time as required, your tag will receive the latest software updates when located within LTE-M coverage on Telstra's IoT Network

For more info on how the Cat-M1 Tag works visit:
