Successful Businesses choose Skyus DS and Meraki.

Inseego's Skyus DS compliments Meraki's hardware to provide an always-on, hands-off, secure network connectivity solution that keeps your business connected and running smoothly.

Inseego's Skyus DS is a drop-in modem solution that seamlessly works with select Meraki routers. We work with Meraki to make these solutions easy to implement; so you instantly gain access to secure high-speed 4G LTE, failover for critical business applications, and maximum uptime with the carrier of your choice.

Together, the Skyus DS and Meraki router are a powerful combination.

Continuous Network Connectivity
In any environment, having and maintaining a solid network connection is crucial to the success of a business, but even more so with POS environments. Meraki and Skyus DS work together to create a secure firewall for your business network with a built-in failover solution, giving you a secure and continuous network connection.

Easy to Install, Worry-Free Solution
Simply plug the Skyus DS into the Meraki hardware, and you're ready for business! This simple plug and play solution means you can rely on a solid connection and concentrate on running your business without ever worrying about your network connection again.

Free to Use Your Carrier of Choice
With this solution, you can use the carrier that best fits your business. Planning to switch carriers? No worries! Skyus DS works with all major carriers, so you can switch to the carrier of your choice without worrying about switching out hardware or upgrading your device.

Find out how Inseego can work with Meraki to keep your business always connected and secure.
